SAMPLE DOCUMENT

This is a sample document for the *Genesys ETFX* package. Please see below for the various commands.

DICE

All dice types have their own commands:

- \BoostDie produces
- \AbilityDie produces ♦
- \ProficiencyDie produces
- \SetbackDie produces
- \DifficultyDie produces ◆
- \ChallengeDie produces

And we all know that $\square \diamondsuit$ and \diamondsuit give us good symbols: $\triangle \bigstar$ and \diamondsuit . Sadly, bad dice give us the negative symbols: $\triangle \bigstar$ and \diamondsuit .

TABLES

Tables are easy to use with the GenesysTable environment.

HEADING	LONG HEADING
Table line one	with the second column
And here's	the second line, with blue background!

CHARACTERS

When you are making stat blocks for NPCs, be sure to use the \Characteristics command which takes 6 arguments, once for each characteristic. Like so:

Lastly, we have the derived numbers: soak, WT and ST. Use the \Derived command, with two arguments?one for the title and the second for the number. For Melee/Ranged defense, we use \DerivedSplit with 5 arguments: title, first number, second number, first subtitle and second subtitle. Using \Derived{Soak}{4} and \DerivedSplit{Defense}{2}{0}{Melee}{Ranged}, for instance, gives us:
